Motiva **Services**

OUR *MISSION*

Our mission is to promote the efficient use of energy and materials and sustainable solutions. We help our customers to achieve measurable and permanent cost savings. We offer services that range from practical level support to energy management consulting. Our customers include industry, service sector and public organizations. Motiva Services Ltd has successfully accomplished several international projects.

More information: services@motiva.fi

EnergyManager™ is a service that helps companies to build up an energy management system that meets their needs. It provides the tools to implement the management system, from starting point to management reviews.

The EnergyInspector™ is a tool to verify the energy performance. This service can include an extensive and detailed energy efficiency analysis or a short scan.

EnergyAdvisor™ service can be a single study or long-term energy efficiency consulting package. The target is to improve the company's cost efficiency and competitiveness. It is always tailored to correspond to the needs of the company.

EnergyTrainer™ is a tailored training package for personnel. This service package can be used in building up energy management system or when a company is implementing practical actions. Training can also be tailored for sales and marketing personnel to increase energy efficiency awareness. It could be organized as on-site training or we can arrange different kinds of virtual trainings. Energy efficiency guides that focus on your needs can also be produced.

The EnergyMonitor™ service helps build up energy efficiency monitoring and reporting system. The main idea is to pay attention to user needs and maximize utilization of existing equipment and systems. Our service contains two parts: a development plan and system implementation phase support.

EnergyManager™ is a service that helps companies to build up an energy management system that meets their needs. It provides the tools to implement the management system, from starting point to management reviews.

4

CONTINUOUS ENERGY EFFICIENCY IMPROVEMENTS WITH EnergyManager™
